

ANOVApot™

breaking the mould

ANOVA Solutions is proud to announce the development of the ANOVApot as the world's first grower friendly container. It provides you with

six points for profit

- 1 Promotes faster growth in overhead and drip irrigation +
- 2 Reduces root escape (less plant attachment, mat breakdown and pathogen build up) +
- 3 Flat base and fewer roots allow a 70% reduction in detailing costs +
- 4 Saves water +
- 5 No basal salt build up +
- 6 No holes for weed and algal growth

Your Formula for Success...
 $1+2+3+4+5+6 = \text{Profit!}$

ANOVATM pot

performs

- > scientist invented
- > grower designed & tested
- > grower endorsed

Growth Comparisons

Superior performance in Overhead and Drip irrigation systems

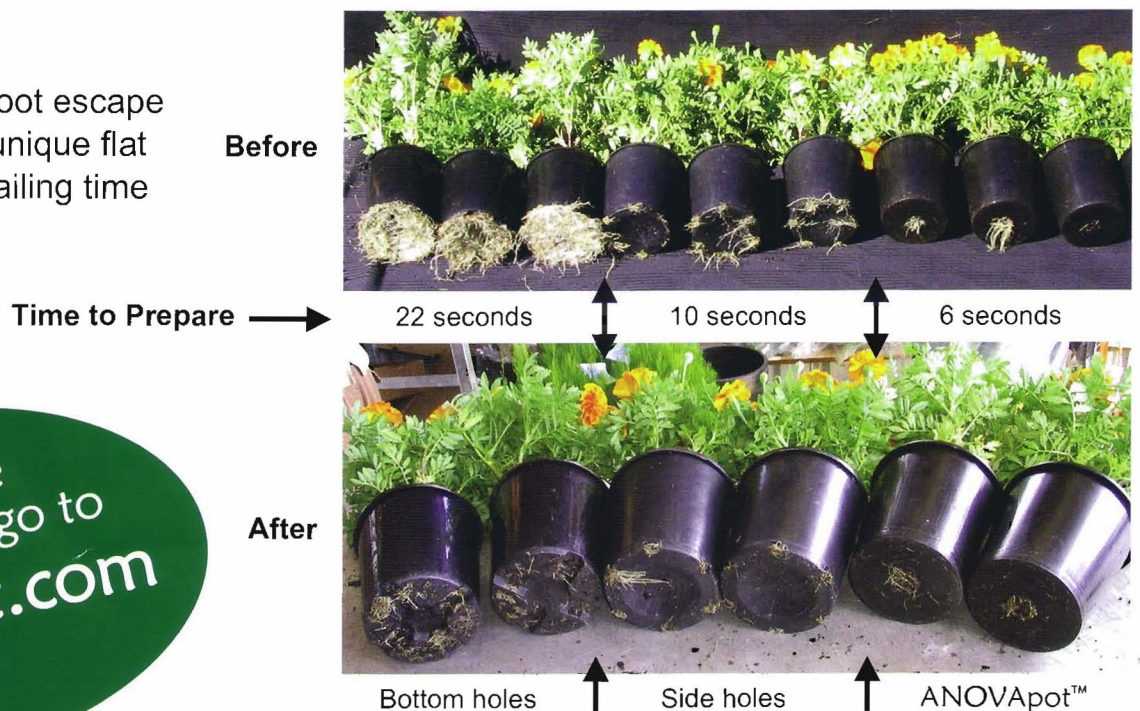

Data from NGIQ/EPA sponsored experiment at DPI&F Research Station, Nov 2004 - Feb 2005

Effect of pot type on plant growth (mean of Marigold, Duranta and Fig) under two irrigation systems

*(Percentage of NIASA-accredited nurseries using Overhead=72.7%, Drip=9.7%, Lane 2003, p63)

Detailing Time

Greatly reduced root escape combined with a unique flat base reduces detailing time
